

{multithumb}

The Cyprus Assay Office offers Gold and Silver alloy analysis services according the official methods ISO 11426 & ISO 13756.

Furthermore, the use of modern equipment (X-Ray Fluorescence) provides the capability of determination of:

- Various metallic elements of the periodic table.
- Alloys such as stainless steel, brass, bronze, etc
- Plating i.e nickel plating.
- Multimetal platings on a basic surface

The charges for these services can be found in the [CAO Pricelist](#) .
